Post-It-List

—

David Stamper & Jonathan Jensen

About Project

- Web App - Task Manager
  - Create, Read, Update and Delete
  - Using ASP.NET Core, Entity Framework, Azure
  - Javascript, Jquery, C#
- MIT License
- Github - https://github.com/dstamper/Post-It-List
- http://postitlist.com
- Contact Us: jojensen@pdx.edu, dstamper@pdx.edu
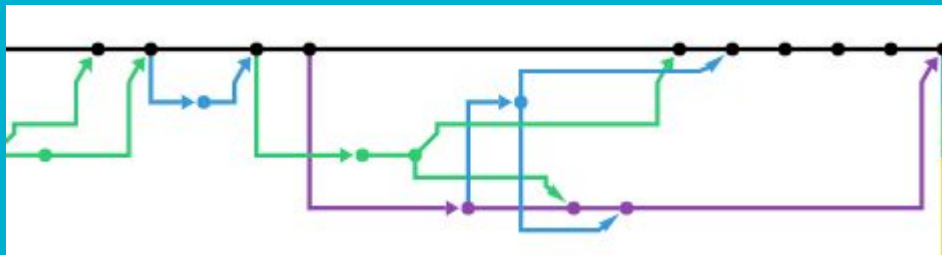

Alternatives to Post-It-List

- Pen & Paper list
- Wunderlist
- Any note program on phone

What We Learned

- Using and designing an API
  - Mobile app
- Front end development - Javascript, Jquery, CSS, HTML
- Using Visual Studio
- Git
- .NET Core MVC
- (Attempted) Unit Testing

Issues/Failures/Challenges

- Learning curve for new tools at beginning
  - GIT
  - Production/Development environments
- Jquery/ javascript
- POST/PUT/DELETE
- Creating a list without refreshing
- Edit and Delete Buttons/ Checkbox

Future

- Adding Subtasks
- Adding user sign-in
- Sync with calendar
- JavaScript framework
- Database persistence
